

SLIDE INTO SAVINGS WITH  
OUR NEW PRODUCT RELEASE

# 10' WATERFALL SLIDES

\*62 per pallet & per color.

Full Freight Charges apply for shipping this item. Local Deliveries are available however, a delivery fee may apply.

## FEATURES

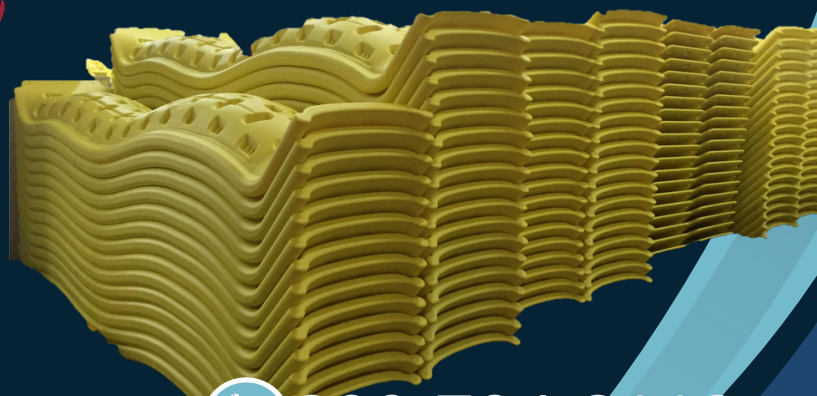

Our new Blow-Molded Slide is 10 feet long and 22 inches wide. It is easily mounted and is available in Blue, Gray, Green, Maroon and Yellow.

Because blow-molding forms the whole component from one highly calibrated tube of plastic, the final product is dense yet light weight. Other manufacturing processes, such as roto-molding, result in final products that are porous and weigh more.

Blow-molding uses a hollow tube inserted into a mold and filled with molten plastic. When air is injected, the tube expands, conforming the plastic to the shape of the mold. Watch a video of this fascinating process!
