

# PRE-HUNG DOORS with PVC JAMBS

**Pre-Hung doors** are Made-To-Order in house by Apple Outdoor Supply with quick production times. They are made with fiberglass slabs and feature PVC Vinyl Jambs for durability. Ideal for barns, sheds, carports, playhouses and other outdoor structures, our doors feature a single bore hole and are **primed and painted** for ease of installation! When ordering doors with a door glass option, it will come installed.

When ordering doors, bear in mind our order increment quantities of (6), (12), (18), etc... Any size or style of door in any quantity can be combined on your order to reach these requirements. Orders of the SAME part number at 6+ quantities will receive a discounted price. Ask customer service for more details!

## FEATURES & BENEFITS OF OUR PRE-HUNG DOORS

DOOR SHOWN: Craftsman Style (6-Lite)

**VINYL JAMBS**

**No painting necessary!  
Less opportunity for dings & nicks.**

**DOOR SLAB** Is Primed & Painted

**Quality-constructed Door Glass options available**

**Door Glass** will be installed and doors come with a single bore hole.

**White Hinges & Stainless Hinges on Outswings**

**Factory Installed Seals & Sweeps**

**Adjustable Threshold & Sealed Threshold for Outswings. Sealed to prevent water incursion.**

**Poly Foam Injected, plug in door bottom**

### DETERMINING SWING:

**OUTSWING:** Standing Inside The Structure, Facing The Door, notate side of Hinge Placement, **INSWING:** Standing Outside The Structure, Facing The Door, notate side of Hinge Placement.

**6 PANEL - PVC FRAME**

**DOOR PAN for PRE-HUNG DOORS**

**Door Pan** for pre-hung doors is specifically designed for 36" prehung doors and is a crucial element for proper water drainage, helping to prevent moisture damage in door installations. A door pan (also known as a sill pan) is a protective tray installed under the threshold of an exterior door. It serves as a barrier that collects and directs water away from the door frame and subfloor, preventing water ingress that can lead to significant structural damage, including rot and mold growth.

**IMPORTANCE OF A DOOR PAN:**

- **Moisture Management:** The primary function of a door pan is to manage moisture. It prevents water from penetrating the wall below the door, effectively "catching" any water that may enter during rain or snow events
- **Protection of Structure:** By ensuring that water drains away from the door and subfloor, door pans help maintain the integrity of the building's framework, preventing costly repairs due to water damage.

Prevent this from happening to your builds with our new door pan!
